Stainless steel stand ——————

FUNCTIONS AND FEATURES

ALL IN ONE

The minimalist panel covers **everything for work and entertainment**.

A 4K resolution display, touch control, web camera and even **a complete office suite**, browser and everything – just like on your computer.

LIKE ON YOUR PC

The system runs on Windows Enterprise and you have **everything that you are used to at your disposal**. Presentations, documents, websites, videos or photos.

PLUG&PLAY

Just hang it on the wall or place it on a stand, **plug it in** and start up the whole system with the touch of a button.

Are you starting a presentation or your favourite film?

BE SEEN

The Logitech MeetUp webcam was created especially for meeting rooms in mind. **The ultra-wide lens, recording optics, 5x zoom** and RighSight™ ensures you are always seen in the best light.

TOUCH CONTROL

Draw, mark up, write or comment – even more colleagues at once. **10 touch points** bring new opportunities for teamwork on joint projects. And if someone is missing, **simply send or share the content with them**.

CONNECT

Do you want to show a photo from your mobile phone or connect to a computer?

SMART-i-WALL® supports all types of data transfers – **iOS/Win/Android**. **USB** and **HDMI** ports are also available for connecting with a cable.

FUSING **DESIGN** AND **TECHNOLOGY**

Modern communication and presentation technologies are nowadays commonplace in every office or conference room. TVs on the walls, conference cameras on the tables, ceiling speakers, and cables everywhere.

We took all those components and **integrated them** into our partition systems, and SMART-i-WALL® was born. **Interactive partition charged with technology**.

Double-sided Screen 75" | RAVA MICRA II | Glass Table

NO CABLES

NO FLIPCHARTS

NO SPEAKERS

NO BULKY TV AND ACCESSORIES

TOUCH & PLAY

Always ready. No need to wait for the system to start up. **Just touch** to wake and start working...

TOTAL INTEGRATION

High definition image, surround sound, and multimedia touch screen, **all integrated inside the partition**.

CLEAN DESIGN

Complimented by our partitions the overall **look is modern and minimalistic**. Just a glass surface configured in the partition system of your choice. No distracting accessories. **Only you and your presentation**.

LIKO-S | PRAGUE

Make use of both sides of your partition, as we did in our branch in Prague, with a double-sided SMART-i-WALL®.

One side serves a conference room for private meetings and the other serves as a workstation for quick discussions and collaborative standup meetings.

CONNECTIVITY & INTEGRATION

Thanks to the touch technology within the glass, **control is the same as on a tablet**. Collaborate on projects, share edits with your colleagues, connect with the integrated 4K conference camera, or stream **content wirelessly from your own device**.

EDIT, COLABORATE, SHARE!

CONNECTION AND SHARING

Connect any mobile device or laptop and **share content quickly and easily**. Your device can also serve as a remote touchpad.

Compatible with Win / Mac / Android

GIANT TABLET

Work as you normally do on your tablet or mobile device. The only difference is **the large, high resolution format**.

Browse through Windows using a single tap. Navigate the web or a presentation with classic gestures, such as a swipe or a zoom, or control the system like a pro with our **special preset gestures**.

CUSTOM APP

Best of both worlds. Use Windows and its **functionality as usual**, or enhance its useability with our application.

It is designed to simplify the user interface and to bring the most frequently used tools and functions **right to your fingertips**.

MENDEL MUSEUM | BRNO

Combining real world elements with virtual tour aspects is the hallmark of SMART-i-WALL® application as illustrated by this project. The wall can be made **transparent or interactive**, and the visitors can conduct experiments to learn about the way genetics work.

The exposition acquired a 4th dimension that fascinated even the youngest of visitors.

UNIQUE
SOUND
EXPERIENCE

No more bulky speakers. Let the partition or furniture generate the sound waves that you hear. We configure all elements for an **unique sound experience** and to support privacy.

Switch to **privacy mode automatically** during a conference call, or set it as a default state, and only the specified elements emits sound. Or, experience sound from all elements in unison in with privacy mode turned off.

SURROUND YOURSELF WITH SOUND.

AMBIENT SOUND

Our unique system makes sound permeate the room **evenly and naturally**. No one has the best spot or sits too close to the source. **Everyone is literally surrounded by sound**.

Improve your focus at work by switching to **ambient mode** (automatically or manually) and let the **subtle sounds of nature** relax and refocus your thoughts.

NO CABLES

You do not have to worry about the placement of the speakers and how to get them there. Depending on the type of the room, we will **integrate and tune everything up for the optimal result**.

MAXIMUM PRIVACY

Our interior partitions meet the **most rigorous acoustic standards** and thus guarantee privacy for your meetings and calls.

Simply switch between **surround sound** and **privacy mode**.

HEAR THE GLASS

With the special placement of tactile transducers we allow the surface of the glass or a partition to **produce the sound that you hear**. For ideal acoustic results we enlist other surfaces in the room, such as tabletops and bookcases.

Be at the source.

SPECIFIED TO YOUR NEEDS.

SMART-i-WALL® and its technologies are **constantly being improved**. So, we take great care during the specification process, to ensure the specified components are right for the project.

Our sales and technical team are available to consult throught the process.

CUSTOM INTERFACE

Use Windows as you normally would or enhance its usability with our application. For **quick and simple control**, setup links to launch presentations or videos and maintain **easy access** to your files and favorite apps.

Optionally, you may **customize the interface** according to your needs or design manual.

TOUCH & PLAY

SMART-i-WALL® is powered by a mini PC which allows it to run as a **standalone solution** on which you may colaborate, stream or share content wirelessly. This standalone solution, is **activated with one touch**. No loading or slow startups.

*An optional All-in-one keyboard is availble as a secondary peripheral device

Windows 10

AMBIENT SOUND

Sound system integrated into the glass, partition, ceiling, or furniture guarantees even sound distributon for all participants. Ambient nature sounds and other themes are ready to enhance **the mood of your workspace**.

The configuration of sound system is based on a consultation to determine design, placement, and functionality.

4K VIDEO CONFERENCE

An optional 4K camera can be integrated into both glass and solid partition systems. Switch to conference mode and **communicate and collaborate in ultra high definition**.

Rotate and change the viewing angle, as well as switch into the conference mode.

Additional accesories are availble.

IMAGE SOURCE 55–85"

Integrated **display** or **projection** – consult with our team to determine **the best solution for your space**. We will help you choose the most suitable option to maximize the impression on your guests and clients.

100% COMPATIBLE

We can integrate SMART-i-WALL® technologies into any of our partition systems. **MICRA I** is the best suited for projection. For built-in display, you can choose: **MICRA II** – frameless double glazed partition, **OMEGA** – classic framed partition or **RAVA**® – the trendy, frameless partition with negative gap.

Special request?

Thanks to our own dedicated development team, we are able to customize SiW according to your specifications.

Contact our sales team for more information.

LIKO-S: THE INNOVATION LEADERS

The **spirit of inovation** is constantly pushing us on. We have been **creating and developing** our own **partitions – glass, mobile, and interactive** – and we are proud to be among the best in Europe. Our design emphasizes **aesthetics, functionality, and acoustics**.

GLASS PARTITIONS

With or without a frame, our partitions meet the **highest demands** in terms of **design and acoustics**.

MOBILE WALLS

Rearrange your office space in a few minutes based on your needs.

LIKO-GLASS®

Graphic design, textiles, plants, or even metal. **We can laminate any material** up to 2 mm thick to create a glass partition that matches design requirement.

ACOUSTIC PANELS

Improve acoustic comfort with our acoustic panels, **SilentPET®**, made from **recycled PET bottles**.
